

Mission Beach Lions Club has donated \$3,622 to the Far North Queensland Hospital Foundation for equipment at the Tully Hospital. This was half the cost of the equipment and our neighbouring club @Tully Lions donated the other half.

The equipment that has been purchased are:

1. Avio Pole – to mount the Avio machine. The Avio Machine assists oxygen flow in patients who are in respiratory distress.
2. Urinalysis Machine – prints out urine test results in a timely manner, allowing the doctor to treat the patient quickly.
3. Tonometer – specialist equipment that measures the pressure in the eye. Pressures that are too high can lead to blindness.

This will benefit many in our community with equipment being available locally and patients not having to travel as far.
